EXPERIENCE

Software Development Engineer 2

SapidBlue (Client: Liongard, USA – Cybersecurity)

Sept. 2025 – Ongoing Gurugram, Haryana

- **Golang Agent + Inspector Development:** Contributed to the development of Liongard's cross-platform **system agent** (Go), responsible for executing cybersecurity "inspectors," handling task scheduling, heartbeats, environment detection, and secure data collection.
- Supported development of multiple inspectors (Node.js) to gather inspection data from target systems and improved speed of inspection by **40%**.

SDE-2

Deltatech Gaming Limited

Nov. 2022 – Sep. 2025 Gurugram, Haryana

- Built a fault-tolerant, event-driven **leaderboard and contest service** using Redis, RabbitMQ, and MongoDB with **graceful shut-downs** for reliability. Designed a high-performance caching and data layer utilizing Redis and PostgreSQL (**materialized views, optimized indexes**), enabling API response times under 15 ms during peak load and offloading heavy reads from the core gaming engine.
- Built a **request tracking system** at gateway that captures meta-data (request time, response time, response size, cache status, requestId) and streaming logs via **Kafka** and stored into Snowflake for monitoring and analytics.
- Developed a **high-performance NestJS** real-time service using **RabbitMQ, WebSockets (Socket.io)** to stream events across mobile, desktop, and executable clients. Integrated a **Redis adapter for horizontal scaling**, enabling shared state across multiple socket pods, dynamic room creation, and efficient event-based broadcasting.
- **Fraud Detection System (Neo4j + API):** Designed APIs for the BI team to analyze relationships between users based on IP, device, and connection length, supporting fraud detection strategies.

Software Developer L2

MapmyIndia

Oct. 2021 – Nov. 2022 Ranchi, Jharkhand

- Developed features for a **React Native** mobile app, optimizing performance and API interactions. ([APP Link](#))
- Migrated complete **Firebase** data/functionality to custom Node.js backend, ExpressJs + MongoDB, implemented **REST APIs** and **cron jobs** for scheduled notifications.
- Integrated ONDC (Open Network for Digital Commerce), implementing **Server-Sent Events (SSE)** for real-time updates.

EDUCATION

B.Tech in Computer Science

Kolhan University, Chaibasa

Aug. 2017 – Aug 2021

CGPA: 7.50/10.00

Intermediate in Science

Narayana Junior College, Ghatkesar

Sept 2015 – June 2017

CGPA: 9.60/10.00

SKILLS

Javascript Typescript Node.Js
websocket MySQL Golang PostgreSQL
MongoDB Kafka RabbitMq

TOOLS & FRAMEWORKS

Nest.Js Git Github Jenkins
Docker Elastic APM Grafana
Prometheus Loki PM2

HACKATHONS & FESTS

- Smart India Hackathon | 2020 - Finalist.
 - QR based Inventory management System for *Airport Authority Of India*.
 - Developed a mobile app which takes details regarding the item and generates a QR code for that item.
- Smart India Hackathon | 2019 - Finalist.
 - Agro Based entrepreneurship in rural areas.
 - Developed a web application where various government schemes can be tracked.

INTERESTS

- Distributed Systems & Performance Optimization.
- Outdoor Sports: Cricket, Volleyball etc.
